PROJECTS

Diabetes Risk Predictor – PIMA Dataset Model [Link](#)

- Built a complete end-to-end Supervised ML Pipeline to predict Diabetes.
- Developed an interactive Streamlit app with customizable decision threshold for real-time predictions.
- Exposed predictions via Flask API.

Autonomous Security Policy Reasoning & Misconfiguration Detection

Present

Platform [Link](#)

- Built a Cloud Security Policy Analyzer to detect IAM misconfigurations and privilege escalation risks.
Developed a Streamlit-based interactive dashboard for cloud risk analysis and attack path visualization.
Implemented multi-format policy scanning (JSON, YAML, CSV, TXT) with automated security rule detection.
Visualized security posture, risk analytics, and cloud attack surface using Python and Plotly.

AD ALCHEMY-AI_AD_GENERATOR [Link](#)

- Developed an AI-based advertisement generator that creates promotional videos from product inputs
- Implemented feature to upload product images and enter product details (price, features, etc.) for automated ad creation.
- Integrated language selection and target market segmentation (Tier II / Tier III regions) to customize advertisements.

SKILLS

Languages HTML, CSS, Python, C, Java

Core Subjects Operating System, DBMS, DSA

Tools & Libraries Git, Vs Code, Github, Colab, Machine Learning

Frameworks Flask

CERTIFICATIONS

Azure Fundamentals (AZ-900), Microsoft
